Globalbridge
环桥

Global Bridge is a company based in Foshan, Guangdong, providing various types of mosaic. We help customers to select different kinds of mosaic through different factories. We take care of quality control, production schedule, standard packing, combined shipment, after sales service and products protection.

1. Rich experience;

We started mosaic business since 2001, and established company on 2006.

We have 15 sales person experienced in foreign trade averaged in 4 years, and the longest is 15 years.

Global Bridge building is over 3000 sqm in which 1000 sqm with showroom. We also have 800 sqm warehouse for keeping samples only.

2. Focusing

Unlike other companies, we mainly focus on various types of mosaic, providing our customer with the full package of mosaic information.

We are selling over 12 thousand items and keep increasing at least 500 items every year.

GB design team has more than 15 years operation experience in mosaic project running and products sourcing.

3. Business Scale

Our average sales volume is around 13 million US dollars.

Our yearly shipment quantity always over 1 million sqm.

We have over 200 regular mosaic customers and now is reaching to 115 countries and areas.

We regularly attend 4 fairs every year, including Canton Fair, Coverings and Marmomacc.

4. Quality Control

We have 7 inspectors which have average experience of 5 years. They all have complete knowledge of different kinds of mosaic.

Each QC is responsible for their specific kind of mosaic, which is good for accumulating professional knowledge.

Our inspection schedule divided into 4 steps. A. sample confirmation B. First sheet confirmation C. Sheets inspection D. Package inspection.

All inspections will be recorded with photos and reports for future review.

5. Products Grantee

We provide Max.8 years grantee for our products. And for other products we provide 3 - 5 years.

FACTORY PRODUCTION

LOADING PROCESS

①Checking the labels, all kinds of, the number and shipping mark.

②Check the container number information.

③Check whether the container is in good condition.

④After loading a row to take pictures.

⑤After the final loading is completed, the packing tape is reinforced.

⑥Check the cabinet number, seals and other information again.

LOADING PROCESS

⑦Container number and seal photo records.

⑧Container number and seal photo records.

For each batch of loading, the warehouse needs to develop a plan according to the quantity and volume of the loading products to determine the size of the container.

Before loading, warehouse staff should check and confirm the order and the batch number.

While loading, the wooden crates must be fixed tight to make sure not easy to be damaged. In case of rain, to use a plastic film on top of the wooden crates. To use wooden bars between the crates to ensure the safety of products during transportation.

During loading, warehouse staff should take photos for record when the container door is open, semi open and closed. Also the staff will take photos of the key number, container number, license plate number and container seal number for record.
